The rebuild seminar in November was a huge success, the main speaker Gerry Brown had us all enthralled with his experience of preparing MGBs for racing, rallying, sprints and hill climbs as well as track days before lunch and we were then given further advice from David Cato on maintaining our cars for optimum

performance. Over 60 people attended and the day was well received. Thanks must go to Danny Waters, Jan Pratt, and Roger Boys for their work in putting this on. not forgetting Doreen Lanning for the refreshments.

Whilst reporting on the sporting side, a very enthusiastic member of the register. David Butler has this season won the Shirley Cooper MGB Register Cup in the Luffield Speed championship; he was also the Southern series winner and second overall in the National series. David's car runs in the road going modified class, and was built from a rubber bumper car that was originally used by his wife as a daily drive, and has been developed over a number of years, lowered, a banjo axle, glassfibre panels, uprated overdrive and a fully ported and gas flowed engine. The photo this month shows David with his car

When you read this we shall be in 2007 and our first event will be the Cotswold Road Run on Sunday April 1st. The start point will be at Millets Farm, Frilford, near Abingdon, we shall also finish there, and an interesting lunch stop is planned. Entry forms can be accessed from the web site. Another event to be confirmed is the Abingdon Works Centre Summer Day Out which is being revived this year and which the Register will be supporting. The venue is still to be advised, but the likely date is to be July 29th.

Finally the register weekend in Holland is now fully subscribed, so regretfully there are no further places left.
